

CSA13 – CLOUD COMPUTING AND BIG DATA ANALYTICS

LAB RECORD – LIST OF EXPERIMENTS

Ex. No: 1 Flight Reservation System

Aim

To create a simple cloud software application for Flight Reservation System using Zoho Creator to demonstrate the Software as a Service (SaaS) cloud model. The application includes fields such as One Way, Round Trip, From, To, Departure Date, Travelers & Class, Fare Type, and International and Domestic Flights.

PROCEDURE

Step 1: Go to Zoho Creator.

Step 2: Login to your Zoho account.

Step 3: Click Create New Application.

Step 4: Enter the application name as Flight Reservation System.

Step 5: Create the new application.

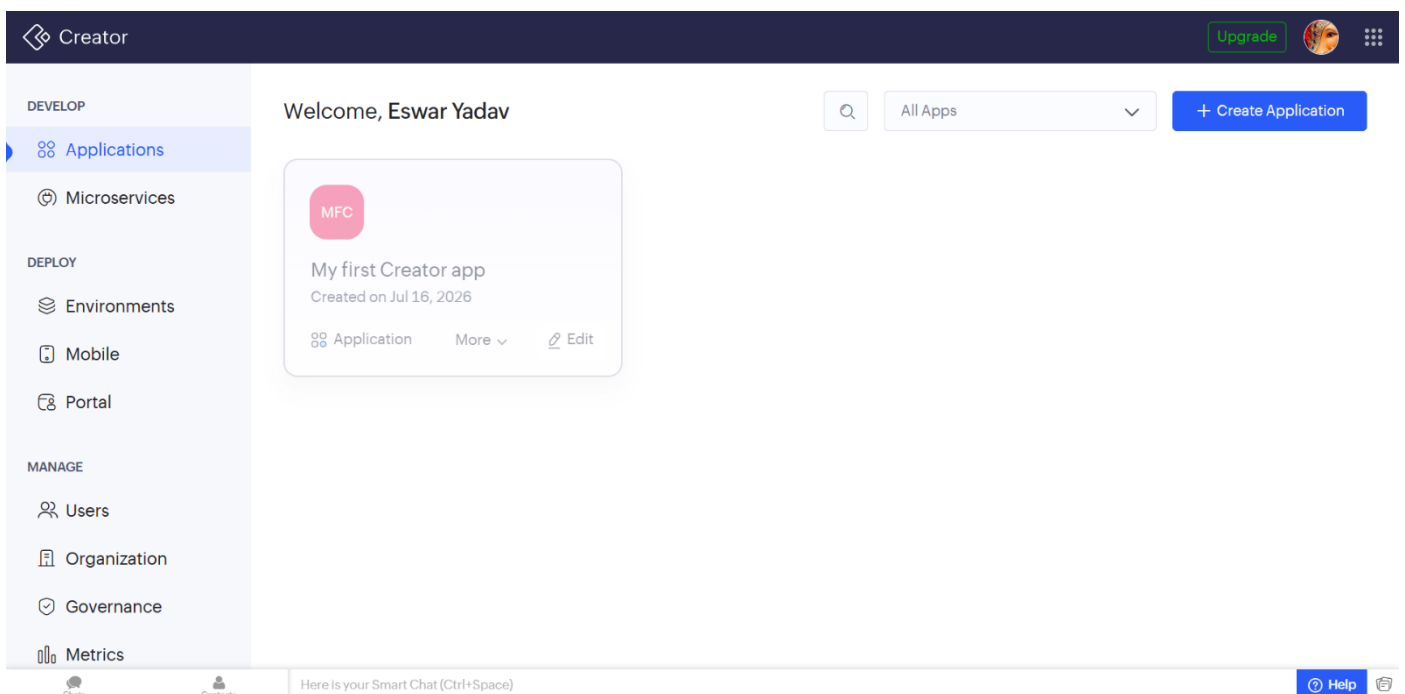

Step 6: Create a Flight Reservation form.

Step 7: Add fields such as Trip Type, From, To, Departure Date, Travelers & Class, Fare Type, and Flight Type.

Step 8: Save and publish the application.

Step 9: The Flight Reservation System has been successfully created as a Software as a Service (SaaS) application.

Output

Create New Application

Create using Zia

Build a functional application effortlessly using GenAI

Create

Create from scratch

Result

Thus the simple cloud software application for Flight Reservation System was created successfully using Zoho Creator to demonstrate the SaaS cloud model.

Ex. No: 2 Property Buying & Rental System (Chennai)

Aim

To create a simple Property Buying & Rental System using Zoho Creator to demonstrate the Software as a Service (SaaS) cloud model.

PROCEDURE

Step 1: Go to Zoho Creator.

Step 2: Login to your Zoho account.

Step 3: Click **Create New Application**.

Step 4: Enter the application name as **Property Buying & Rental System**.

Step 5: Create the new application.

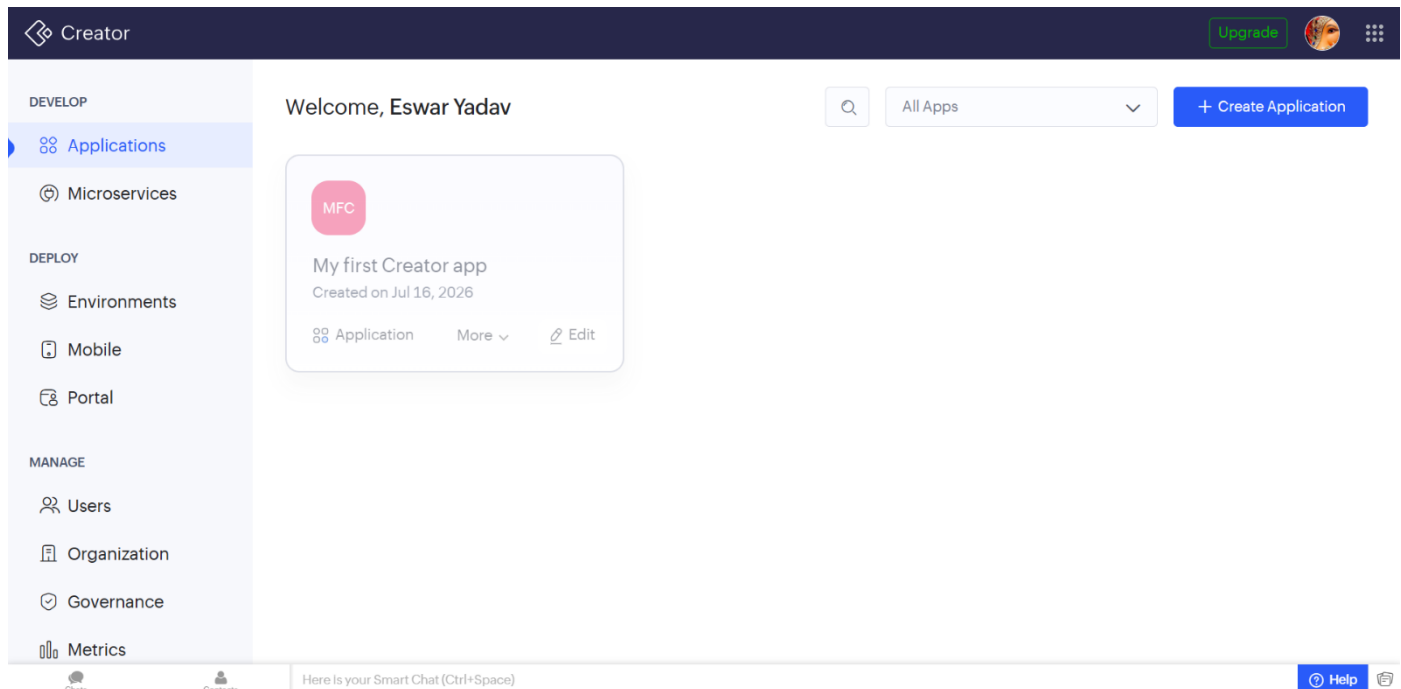

Step 6: Create a **Property Details** form.

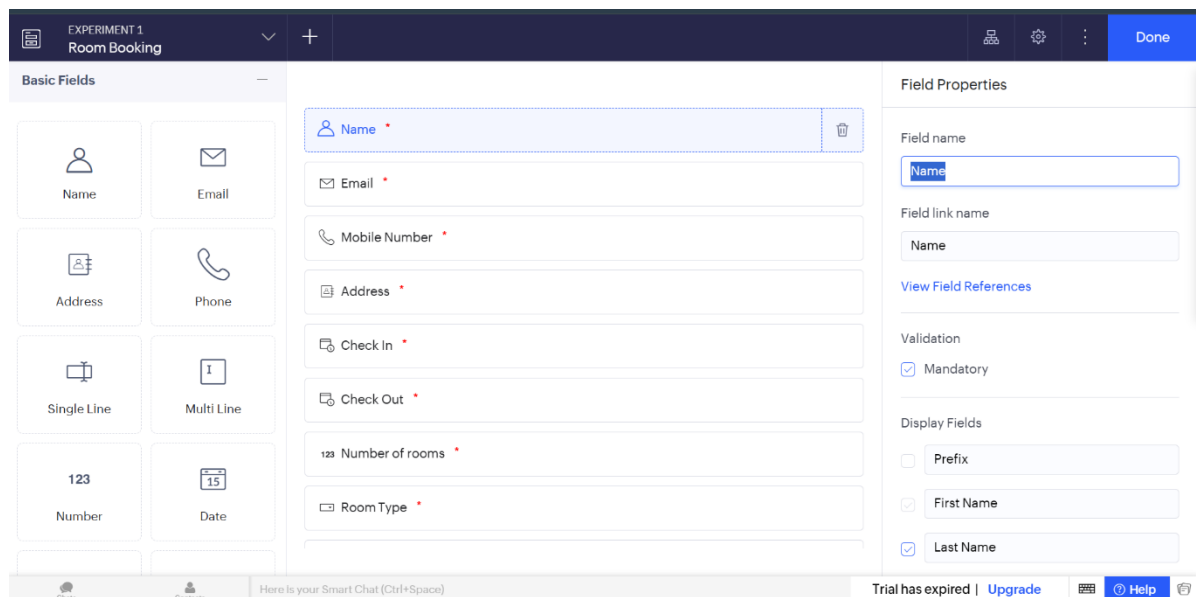

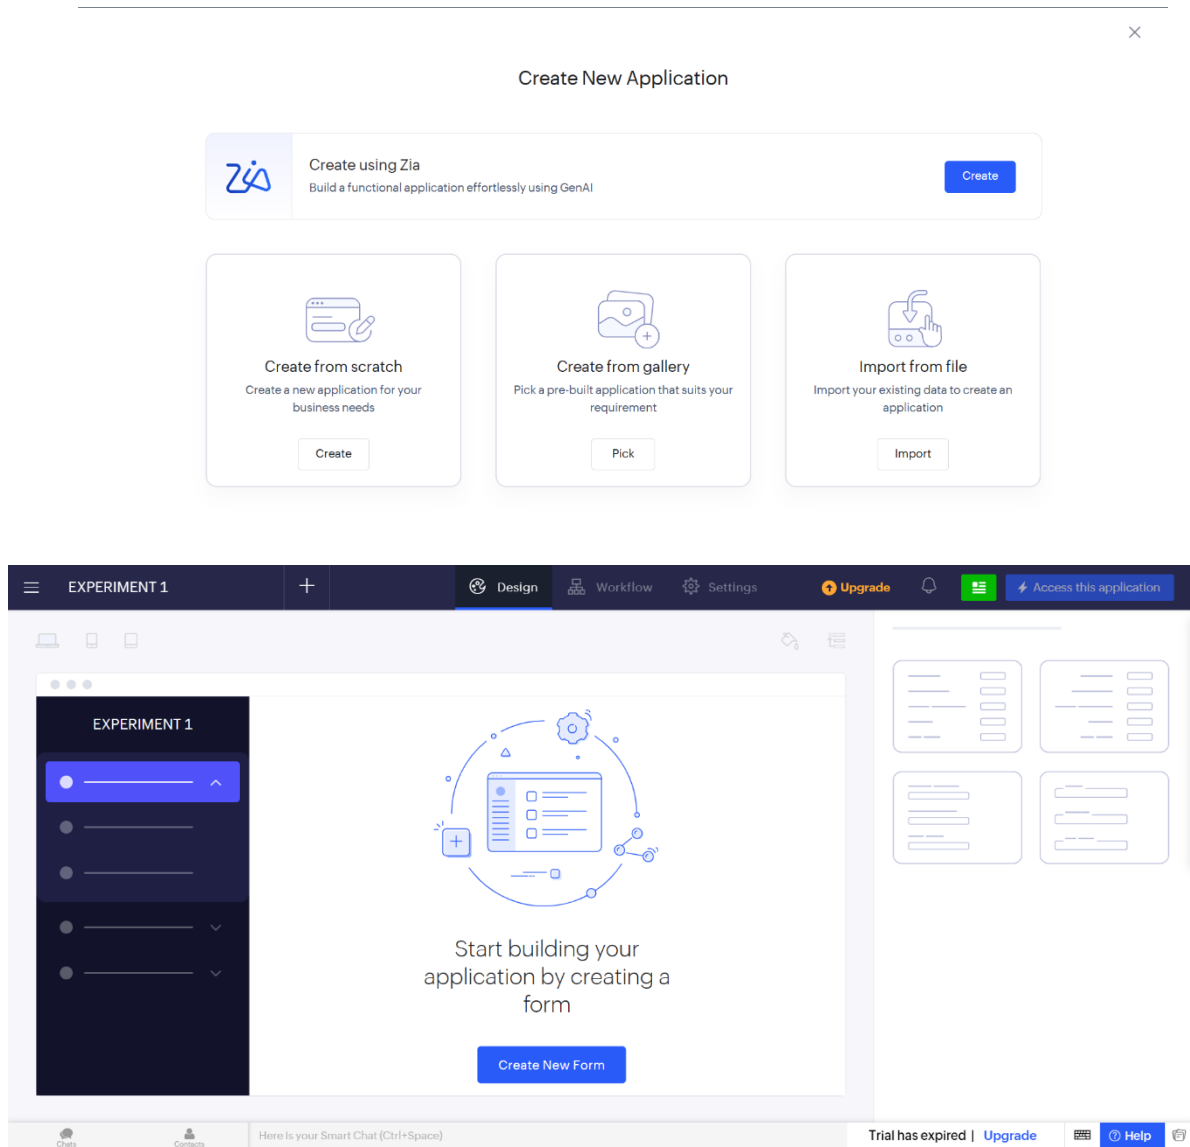

Step 7: Add fields such as **Property Type, Buy/Rent Option, Location, Budget, Bedrooms, Property Size, and Contact Details**.

Step 8: Save and publish the application.

Step 9: The **Property Buying & Rental System** has been successfully created as a **Software as a Service (SaaS)** application.
